The Lakeshore Reinvestment Strategy

Marquette Plan

This graphic was produced to support the Marquette Plan, a comprehensive strategy for the development of the Marquette area along the Lake Michigan shoreline in the City of Chicago. The plan includes a mix of residential, commercial, and recreational uses, with a focus on preserving and enhancing the natural beauty of the area. The Marquette Plan is intended to provide a framework for future development, ensuring that growth is sustainable and that the unique character of the area is preserved. The plan identifies key areas for development and outlines strategies for achieving the goals of increased economic activity, improved quality of life, and enhanced environmental stewardship. The Marquette Plan is a collaborative effort involving local government, private sector partners, and community stakeholders, working together to create a vibrant and thriving waterfront community.
